

VIRTUAL (ONLINE) DEBT COLLECTIONS TRAINING PROGRAM

CK 6343 Micro-Financial (MSME) Debt Collections & Revenue Management Procedures for Commercial Banks and Other Financial Institutions Testimonials

Dominica Agricultural Industrial & Development (AID) Bank

The features and functions of the debt collections software system really caught my interest, and to me, this was the best and most informative part of this training program. Learning about debt collections software program provided me with insights into how technology can be used to efficiently manage debt recovery operations.

I found every part of this training program invaluable, however, the section that covered basic debt collections concepts and practices for new collectors was less impactful, since I was already familiar with them.

This program is highly recommended because it provides both micro, medium, and macro enterprises with standardized, practical and proactive strategies to improve debt collections and enhance financial sustainability.

By attending this program, it will improve my effectiveness because of the knowledge gained. It will also support practical recovery efforts to standardize debt collections and revenue management techniques. It will also strengthen cashflow management and reduce delinquency.

Kenneth Albert, Manager (Recoveries), Acting, Dominica AID Bank

The section that was of utmost importance to me was the area on the features and functions of a robust debt collections software. The greatest value to me, demonstrated how the use of this type of software would enhance the bank's delinquencies and increase overall financial performance.

I would recommend this training program to others because it will provide them with the necessary skills to manage delinquencies and achieve favorable outcomes. It personally has provided me with the relevant knowledge to strengthen technical and practical recovery skills. I know that I will be better equipped to assess accounts and prioritize recovery efforts in a customer friendly manner.

Patricia Shillingford-Chambers, Recoveries Officer, Acting, Dominica Agricultural Industrial & Development (AID) Bank
